

CYBER SECURITY

UNIT 3 – COMPLETE DETAILED NOTES

Cyber Crime & IT Act 2000 • Hacking • Teenage Web Vandals • Cyber Fraud & Cheating • Defamation • Harassment & E-mail Abuse
Other IT Act Offences • Monetary Penalties • Jurisdiction & Cyber Crimes • Nature of Criminality • Strategies to Tackle Cyber Crime & Trends

Book-style notes with Practical Examples, Definitions, Flowcharts, Diagrams, Important Points, Exam Notes & Memory Tricks

UNIT 3 – SYLLABUS (As per Examination)

S.No	Unit 3 Topics	Marks
1	Concept of Cyber Crime and the IT Act, 2000	---
2	Hacking	---
3	Teenage Web Vandals	---
4	Cyber Fraud and Cheating	---
5	Defamation	---
6	Harassment and E-mail Abuse	---
7	Other IT Act Offences	---
8	Monetary Penalties	---
9	Jurisdiction and Cyber Crimes	---
10	Nature of Criminality	---
11	Strategies to Tackle Cyber Crime and Trends	---

How to read this book: Har topic me sabse pehle ek **long practical example** diya hai, phir **short definition**, phir **flowchart / diagram**, phir **important points** aur aakhir me **exam notes**. Isi order me padhna — definition yaad aasan ho jayegi.

CONTENTS

UNIT 3 – SYLLABUS (As per Examination)	2
PART 1 – CONCEPT OF CYBER CRIME AND THE IT ACT, 2000	6
1.1 Long Practical Example (Real Life)	6
1.2 Definition	6
1.3 Flowchart	6
1.4 IT Act, 2000 — Key Points	6
1.5 Cyber Crime vs Cyber Law	7
1.6 Prevention (Bachao Ke Tarika)	7
PART 2 – HACKING	8
2.1 Long Practical Example (Real Life)	8
2.2 Definition	8
2.3 Flowchart	8
2.4 Hacking ke Types	8
2.5 Hacking vs Cracking	9
2.6 Prevention (Bachao Ke Tarika)	9
PART 3 – TEENAGE WEB VANDALS	10
3.1 Long Practical Example (Real Life)	10
3.2 Definition	10
3.3 Flowchart	10
3.4 Kyun Karte Hain (Motives)	10
3.5 Important Points	10
3.6 Prevention (Bachao Ke Tarika)	11
PART 4 – CYBER FRAUD AND CHEATING	12
4.1 Long Practical Example (Real Life)	12
4.2 Definition	12
4.3 Flowchart	12
4.4 Common Frauds (Types)	12
4.5 Fraud vs Cheating (Ek Nazar)	13
4.6 Prevention (Bachao Ke Tarika)	13

PART 5 – DEFAMATION	14
5.1 Long Practical Example (Real Life)	14
5.2 Definition	14
5.3 Flowchart	14
5.4 Types of Defamation	14
5.5 Important Points	14
5.6 Prevention (Bachao Ke Tarike)	15
PART 6 – HARASSMENT AND E-MAIL ABUSE	16
6.1 Long Practical Example (Real Life)	16
6.2 Definition	16
6.3 Flowchart	16
6.4 Types of Harassment	16
6.5 Important Points	17
6.6 Prevention (Bachao Ke Tarike)	17
PART 7 – OTHER IT ACT OFFENCES	18
7.1 Long Practical Example (Real Life)	18
7.2 Definition	18
7.3 Flowchart	18
7.4 Key Other Offences (Table)	18
7.5 Important Points	19
PART 8 – MONETARY PENALTIES	20
8.1 Long Practical Example (Real Life)	20
8.2 Definition	20
8.3 Flowchart	20
8.4 Key Penalty Sections (Table)	20
8.5 Important Points	20
8.6 Prevention (Bachao Ke Tarike)	21
PART 9 – JURISDICTION AND CYBER CRIMES	22
9.1 Long Practical Example (Real Life)	22
9.2 Definition	22
9.3 Flowchart	22

9.4 Jurisdiction Rules (Table)	22
9.5 Important Points	23
9.6 Prevention (Bachao Ke Tarike)	23
PART 10 – NATURE OF CRIMINALITY	24
10.1 Long Practical Example (Real Life)	24
10.2 Definition	24
10.3 Flowchart	24
10.4 Characteristics (Table)	24
10.5 Important Points	25
10.6 Prevention (Bachao Ke Tarike)	25
PART 11 – STRATEGIES TO TACKLE CYBER CRIME AND TRENDS	26
11.1 Long Practical Example (Real Life)	26
11.2 Definition	26
11.3 Flowchart	26
11.4 Strategies (Detail)	26
11.5 Trends (Aaj Kal Ke Attacks)	27
11.6 Prevention (Bachao Ke Tarike)	27
APPENDIX – QUICK REVISION SHEET (UNIT 3)	29

PART 1 – CONCEPT OF CYBER CRIME AND THE IT ACT, 2000

Cyber crime wo crime hai jo **computer / internet ke through** hota hai. Aur India me isko rokne ke liye **IT Act, 2000** banaya gaya — jo cyber crimes ki saza aur penalty batata hai.

1.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Rahul ne online shopping site par apna bank card use kiya. Ek din uske account se **50,000 रुपये** gayab ho gaye — usne card use nahi kiya tha.

Jaane par pata chala: ek website ne uski card details (skimming se) chura li thi aur doosre state me paisa nikala gaya.

Rahul ne **cyber cell** me complaint ki. Police ne **IT Act, 2000** ke under case dara:

- Section 66 — hacking (computer system me ghus kar damage).
- Section 66C — identity theft (card details).

Court ne hacker ko **jail + fine** ki saza di. Rahul ko kuch paisa wapas mila.

Isliye IT Act chahiye — cyber crime karne wale ko law ke through pakda jaye.

1.2 Definition

DEFINITION

Cyber Crime — computer, internet ya digital device ke through ki gayi criminal activity (chori, dhoka, gali, data tampering, hacking, aadi).

IT Act, 2000 — India ka cyber law jo electronic transactions ko legal maanyata deta hai aur cyber crimes ke liye **offences + penalties** define karta hai.

Simple: Cyber Crime = Digital gunaaah; IT Act = Digital gunahon ki book (kya saza milegi).

1.3 Flowchart

FLOWCHART

1.4 IT Act, 2000 — Key Points

- **Kab banaya:** 2000 me. **Kyun:** internet se hone wale crimes aur electronic kaam ke liye.
- Ye **digital signature, e-commerce, e-governance** ko legal banata hai.
- **Section 66** — hacking ki saza: 3 saal jail + 5 lakh fine.
- **Section 66C** — identity theft: 3 saal jail + 1 lakh fine.
- **Section 66D** — personation se cheating: 3 saal jail + 1 lakh fine.

- **Section 67** — obscene content publish karna.
- **Section 43** — computer system ko damage karne par penalty up to 1 crore.
- **66A** (offensive messages) ko Supreme Court ne 2015 me khatam (Shreya Singhal case) kar diya.

1.5 Cyber Crime vs Cyber Law

Basis	Cyber Crime	IT Act (Cyber Law)
Kya hai	Crime jo computer se hota hai	Law jo us crime ki saza deta hai
Example	Hacking, identity theft	Section 66, 66C, 67
Kaam	Hota hai (action)	Rokta hai (rule)
Result	Nuksan	Saza / penalty

1.6 Prevention (Bachao Ke Tarike)

- Cyber crime hone par turant **cyber cell / cybercrime.gov.in** par report karo.
- Apni **complaint aur proof (screenshots)** sambhal ke rakho.
- Bank fraud ho to **bank ko turant batao** aur card block karo.
- Cyber crime ka **18/100 prati se hone wala** risk kam karo — strong passwords + 2FA.
- Kisi ke saath **cards/OTP share na karo**.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Cyber Crime = computer/internet se criminal activity.
2. IT Act 2000 = India ka cyber law — offences + penalties.
3. Section 66 = hacking (3 yr + 5 lakh), 66C = identity theft (3 yr + 1 lakh), 67 = obscene content.
4. 66A ko 2015 me SC ne khatam kar diya (Shreya Singhal case).

Viva Q1. IT Act kab aur kyu banaya?

Ans: 2000 me — electronic kaam legal aur cyber crimes punishable banane ke liye.

Viva Q2. 66A kyu hataya gaya?

Ans: Ye free speech par pabandi thi, SC ne isse unconstitutional declare kiya.

MEMORY TRICK

Cyber Crime = Digital gunaah, IT Act = Digital gunahon ki book. Trick: **6-6-6 ki mithai** — 66=hacking, 66C=identity, 66D=cheating, sab ~3 saal jail.

PART 2 – HACKING

Hacking ka matlab hai kisi ke system / account me **bina permission ghusna** — chahe paisa churana ho ya sirf data dekhna. IT Act me iski saza Section 66 ke under hai.

2.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ek student **Vicky** ko pata chala ki school ke result portal ki password **admin123** hai.

Usne login kiya aur:

- Apne aur doston ke **marks change** kar diye.
- Doosre students ke **results dekhne** laga.
- Ek din school ke **system ka data delete** kar diya.

School ne complaint ki. Cyber cell ne Vicky ko pakda — **Section 66 (Hacking)** ke under case bana.

Saza: 3 saal jail + 5 lakh fine. Vicky ko apni galti ka pata chala.

Bina permission system me ghus kar data badalna/dekhna/delete karna — Hacking.

2.2 Definition

DEFINITION

Hacking kisi ke **computer system, network ya account** me bina permission access lena hai — data churana, badalna, delete karna ya system ko nuksan pahunchana.

IT Act ke **Section 66** me hacking: system me access le kar data change/delete/damage — saza 3 saal jail + 5 lakh fine.

Simple: Apne dil se ghusna mana hai — hacking wo ghusna jo bina ijaazat hota hai.

2.3 Flowchart

FLOWCHART

2.4 Hacking ke Types

Type	Kya hota hai
Website hacking	Website deface / data nikalna
Account hacking	Email/social/bank account ka take-over

System hacking	Computer/server par ghusna
WiFi hacking	WiFi password todna, network me ghusna
Mobile hacking	Phone/WhatsApp ka access lena

2.5 Hacking vs Cracking

Basis	Hacking	Cracking
Kaun karta hai	Hacker	Cracker
Motive	Knowledge / security (kabhi kabhi bad)	Hamesha criminal motive
Law	White-hat legal ho sakta hai	Hamesha illegal

2.6 Prevention (Bachao Ke Tarike)

- **Strong password** + 2FA har account par.
- Software / apps ko **update** karte raho (bugs patched).
- Unknown **links / attachments** na kholo.
- Apni **WiFi password** strong rakho.
- Kisi ko **login / OTP share na karo**.
- System par **antivirus + firewall**.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Hacking = bina permission system me access + data change/delete/damage.
2. IT Act Section 66 = hacking ki saza (3 saal + 5 lakh).
3. White-hat = legal (security), Black-hat = criminal, Cracker = hamesha criminal.

Viva Q1. Hacking aur cracking me farak?

Ans: Hacking knowledge/security ke liye ho sakti hai; cracking hamesha criminal motive se.

Viva Q2. Section 66 ki saza?

Ans: 3 saal jail + 5 lakh fine.

MEMORY TRICK

Hacking = Bina ijaazat ghusna. Trick: **66 = 6-6** — 3 saal jail + 5 lakh fine. Yaad rakho: system ka darwaza toda, Section 66 laga.

PART 3 – TEENAGE WEB VANDALS

Teenage Web Vandals — 13–19 saal ke bachche jo internet par **website deface**, **hacks** ya **nuksan** karte hain — aksar mazak, show-off ya badle ke liye.

3.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ek 16 saal ka student **Aman** ne school ki website ki login password (**admin**) dhoondh li.

Usne home page par apna naam aur mazak ka message likh diya — “**Aman was here!**”

Sabhi students ne dekha aur use cool samjha. School ko sharam aayi — website 2 din band rahi.

Cyber cell ne Aman ko pakda:

- Section 66 (hacking) + Section 66D (cheating).
- Bhaale wo minor tha — **Juvenile Court** me case gaya.

Teenage bachche websites par aise hacks/mazak karte hain — Teenage Web Vandals.

3.2 Definition

DEFINITION

Teenage Web Vandals wo **young (teenage) individuals** hain jo internet par **websites deface karte hain, data badalte hain, ya vandals (nuksan karna)** jaise hacks karte hain — aksar attention, mazak, show-off ya badle ke liye, na ki professional cyber crime ke liye.

Simple: Bade criminals paisa maangte hain; teenage vandals **attention maangte hain**.

3.3 Flowchart

FLOWCHART

3.4 Kyun Karte Hain (Motives)

Motive	Matlab
Show-off	Doston ko dikhana ki 'main hacker hoon'
Curiosity	Yeh kaise kaam karta hai, test karna
Badla / revenge	School ya teacher se gussa
Attention	Famous hona chahte hain
Peer pressure	Doston ke kehne par

3.5 Important Points

IMPORTANT POINTS

1. Ye **minor hote hain** (18 se kam) — isliye juvenile justice ke under deal hota hai.
2. Aksar ye **sochte nahi** ki wo crime kar rahe hain.
3. **Harm less lagta hai** par legal consequences bade hote hain.
4. Inhe **school + parents ke through** guide karna best hai — cyber safety education.
5. Kuch aage ja ke **ethical hackers / security experts** bhi bante hain.

3.6 Prevention (Bachao Ke Tarike)

- Schools me **cyber safety / cyber ethics** ki padhai.
- Parents bachcho ke **internet activity** par nazar rakhein.
- Bachcho ko batana ki **hack ka matlab crime** hai — mazak nahi.
- Hacking ki jagah **ethical hacking / coding** ka rasta dikhana.
- Website par **strong admin password + logging** rakho.
- Deface hote hi **report karo** — deri se case weak hota hai.

EXAM NOTES (2 MARKS / VIVA)**Exam Notes (2 Marks):**

1. Teenage Web Vandals = teens jo websites deface/hack karte hain mazak ya show-off ke liye.
2. Motive = attention, curiosity, revenge, peer pressure.
3. Ye minors hain — juvenile court me case, lekin crime legal hai.
4. Best bachao = cyber ethics education + parents ka dhyan.

Viva Q1. Vandals professional criminals se kaise alag?

Ans: Unka motive paisa nahi — attention/mazak/show-off hota hai.

Viva Q2. Inse kaise niplein?

Ans: Awareness + cyber ethics + ethical hacking ka rasta.

MEMORY TRICK

Teenage Web Vandals = Internet ke naughty bachche. Trick: Vandals = **wall par naam likhne wale** — bas wall (website) internet ki hai aur saza Section 66 ki.

PART 4 – CYBER FRAUD AND CHEATING

Cyber Fraud / Cheating — internet par dhokha de kar paisa ya cheez haasil karna. Ye India ka sabse zyada hone wala cyber crime hai.

4.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Rohit ko WhatsApp par ek **job offer** aaya — “part-time, aaram se 5000/day kamaiye.”
 Usne form bhara. Phir **acche kaam ke liye advance paisa** maanga gaya — “registration fee.”
 Rohit ne 20,000 bhej diye. Phir aur paisa maanga — “tax clear karo.”
 Jab aur paisa maangne lage to Rohit ko shak hua. Ab number band — paisa gaya.

Ye **Online Job Fraud** hai. IT Act Section 66D (cheating by personation) + IPC me bhi cheating ka case.

Internet par jhootha bharosa de kar paisa lena — Cyber Fraud and Cheating.

4.2 Definition

DEFINITION

Cyber Fraud wo **dhokha** hai jo internet/computer ke through kiya jata hai — jisme victim se **jhootha bharosa karwa ke paisa ya property** haasil ki jati hai.

IT Act **Section 66D** — personation (fake pehchan) se cheating: 3 saal jail + 1 lakh fine.

Simple: Jhooth ka khel — screen ke piche ka fraudster.

4.3 Flowchart

FLOWCHART

```

  Fraudster fake story banata hai
    | (job / prize / bank help / lottery)
    ▼
  Victim ko message / call / website
    |
    ▼
  Victim ko bharosa ho jata hai
    |
    ▼
  Victim paisa / OTP / details deta hai
    |
    ▼
  Fraudster ghaayab (Section 66D + IPC)
  
```

4.4 Common Frauds (Types)

Fraud	Kya hota hai
Job fraud	Fake job offer ke naam par fee lena
Prize/lottery fraud	‘Aapko crore mila’ — pehle fee maangna
Bank / KYC fraud	Bank wala ban kar OTP/details nikalwana
Online shopping fraud	Product nahi bhejna, paisa le lena
Matrimonial fraud	Fake profile se relationship + paisa
Investment / crypto fraud	Fake scheme me paisa daalwana

4.5 Fraud vs Cheating (Ek Nazar)

Basis	Fraud	Cheating
Matlab	Dhokha de kar gain lena	Jhooth se bharosa banakar nuksan karna
IT Act	66D (personation)	IPC Section 415/420 + 66D
Example	Fake bank call	Fake job / fake shopping site

4.6 Prevention (Bachao Ke Tarike)

- **Kisi ko bhi OTP / PIN / password na do** — bank kabhi nahi maangta.
- Job/prize ke liye **advance paisa kabhi na bhejo**.
- Link/site verify karo — **official URL** dekho.
- Bina jaanch **investment/crypto scheme** me paisa na daalo.
- Dhoke me aa jao to **turant report** + bank card block.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Cyber Fraud = internet par dhoka de kar paisa/property haasil karna.
2. Types = job, prize, KYC, shopping, investment fraud.
3. IT Act: 66D (personation cheating) 3 saal + 1 lakh; IPC 415/420 bhi lagta hai.
4. Sabse important rule = **OTP share karo, fraud hote hi report karo**.

Viva Q1. Section 66D kya punish karta hai?

Ans: Fake pehchan (personation) se online cheating — 3 saal jail + 1 lakh fine.

Viva Q2. Sabse common online fraud?

Ans: Job fraud aur bank/KYC fraud — OTP nikalwana.

MEMORY TRICK

Cyber Fraud = Jhooth ki diwali. Trick: Koi bhi **pehle paisa maange** — **wo fraud hai**. OTP maange to seedha suspect karo.

PART 5 – DEFAMATION

Defamation — kisi ki **izzat par hamla** — aisa jhooth/be-izzati ki baat jo online (social media, email) me phailayi jaye. Online defamation **Cyber Defamation** kehlati hai.

5.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Anita aur Priya ki dosti toot gayi. Gussa me Priya ne Anita ki **fake photo + jhoothi baatein** Instagram par post kar di — “Anita ne ye kiya!”

- Post viral ho gayi — doosre log bhi share karne lage.
- Anita ke rishtedaar, office — sabne dekha.
- Anita ka **reputation kharab** ho gaya, kaam par bhi issue hua.

Anita ne **cyber defamation** ki case ki:

- IT Act Section 66A tha (ab nahi) + IPC Section 499/500 (defamation).

Court ne Priya ko saza + Anita ko compensation dilwaya.

Online jhooth bol kar kisi ki izzat girana — Cyber Defamation.

5.2 Definition

DEFINITION

Defamation kisi insaan ke **reputation (izzat) ko nuksan** pahunchana hai — aisi baat/photos/videos jo false hon aur public me phail jayein. Jab ye **internet (social media, email, blogs)** par hota hai — usse **Cyber Defamation** kehte hain.

Simple: Screen par izzat ka attack — jab wo baat viral ho jaye.

5.3 Flowchart

FLOWCHART

5.4 Types of Defamation

Type	Kya hota hai
Libel	Written / visible form (post, photo, video)
Slander	Spoken form (rumor, voice note)
Cyber defamation	Internet par libel/slander (social media, email)

5.5 Important Points

IMPORTANT POINTS

1. Online defamation ki case me **proof** aasaan hota hai — post/email screenshots saved rehti hain.
2. Ek baar viral, **hamesha ke liye** — isliye social media par pehle soch, phir post.
3. **IP / account** se offender pakda jata hai.
4. Bharat me defamation **criminal (IPC 499/500) + civil (damages)** dono me hai.
5. True but private info bhi defamation nahi — **sirf false + harmful** baat defamation hai.

5.6 Prevention (Bachao Ke Tarike)

- Post karne se pehle socho — **sab log padhenge**.
- Gussa me koi **post/rumor na phailao**.
- Apni **privacy settings** strong rakho.
- Apni hi defamation ho to **screenshots save** karke report karo.
- Bina saboot **kisi par ilzaam na lagao**.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Defamation = kisi ki izzat ko false + harmful baat se nuksan.
2. Online = cyber defamation; Libel = written, Slander = spoken.
3. Laws: IPC 499/500 (defamation) + civil damages.
4. Proof internet par aasaan — screenshots/account se offender pakda jata hai.

Viva Q1. Defamation ke 2 types?

Ans: Libel (written/visual) aur Slander (spoken).

Viva Q2. Online defamation ka proof kya hota hai?

Ans: Post/email ke screenshots, IP, account details.

MEMORY TRICK

Defamation = Izzat ki LOL. Trick: Defamation = **Defame** = naam kharab. Post viral = izzat viral (galat tarike se).

PART 6 – HARASSMENT AND E-MAIL ABUSE

Harassment and E-mail Abuse — online par pareshan karna, gali dena, dhamkana ya email/account ka galat use karna. Ye cyber bullies, ex-partners aur stalkers karte hain.

6.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Pooja apne ex-boyfriend Arjun se alag ho gayi. Arjun gusse me:

- Roz Pooja ko **gali wale emails** bhejta.
- Uske **fake account** bana kar galat messages bhejta.
- Uske **photo/phone number** group me share kar deta.
- Har jagah usse **follow + dhoki** — social media par.

Pooja bahut dar gayi. Usne cyber cell me complaint ki.

Case bana:

- IT Act Section 67 (obscene content) + IPC 354D (stalking) + IPC 499 (defamation).

Online par kisi ko pareshan karna, dhamkana ya account ka galat use — Harassment & E-mail Abuse.

6.2 Definition

DEFINITION

Cyber Harassment kisi ko **internet ke through pareshan karna** hai — threats, gali, stalking, fake accounts, private info leak, ya embarrassing content post karna.

E-mail Abuse — email ka galat use: threatening emails, fake emails, spamming, ya kisi aur ke naam par email bhejna.

Simple: Bullying jo ab school se internet par shift ho gayi hai.

6.3 Flowchart

FLOWCHART

6.4 Types of Harassment

Type	Kya hota hai
Cyberstalking	Baar-baar follow, messages, tracking
Cyberbullying	Juniors/classmates ko online gali/pareshan
Trolling	Jaan-boojh kar provoke karna

Doxxing	Private info (address/phone) public karna
Sextortion	Private photos ke through dhamkana
Fake accounts	Kisi aur ki pehchan se galat kaam

6.5 Important Points

IMPORTANT POINTS

1. Harassment me **ek baar ka incident nahi** — repeat behaviour matter karta hai.
2. **Screenshots rakhna** zaroori hai — warna proof nahi.
3. Harasser ko **pehle block** karo, reply na do.
4. Bhartiya law: **IT Act 67** (obscene) + **IPC 354D** stalking + **IPC 506** threat + **IPC 509** word/gesture insult.
5. Shame nahi — **complaint karna** hi solution hai.

6.6 Prevention (Bachao Ke Tarike)

- Harasser ko turant **block + report** karo.
- **Private info** (phone/address/photos) online mat daalo.
- Accounts par **privacy settings** lock rakho.
- Social media par **2FA** — fake account se bachav.
- Koi dhamkaye to **cybercrime.gov.in** par complaint karo.
- Family aur doston ko **batao** — alone fight mat karo.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Harassment = online pareshan karna (stalking, bullying, doxxing, sextortion).
2. E-mail abuse = threatening/fake email, spam, galat use.
3. Laws: IT Act 67 (obscene), IPC 354D (stalking), 506 (threat), 509 (insult).
4. Proof = screenshots + repeat behaviour.

Viva Q1. Cyberstalking kya hai?

Ans: Online baar-baar follow, messages, tracking karke pareshan karna.

Viva Q2. Harassment me sabse pehle kya karein?

Ans: Block karo, reply na do, screenshots save karke complaint karo.

MEMORY TRICK

Harassment = Online darr. Trick: **Harassment = Harrass = Haraas** — bilkul. Proof: Screenshots hi asli haathiyar.

PART 7 – OTHER IT ACT OFFENCES

Hacking, fraud, defamation ke alawa IT Act me **aur bhi offences** hain — obscene content, identity theft, data tampering, privacy violation — jo regular cyber cases me ate hain.

7.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ramesh ne ek raat me:

- Apne ex-boss ki email **hack** kar li (Section 66).
- Uske naam se **fake profile** bana kar galat baatein bheji (Section 66D).
- Boss ki **private photos** online daal di (Section 66E - privacy).
- Gali wale content bhi post kar diye (Section 67 - obscene).

Cyber cell ne case bana — **4 alag-alag IT Act offences** ek hi case me.

Ye sab '**Other IT Act Offences**' kehte hain — jo har roj cyber cases me aate hain.

7.2 Definition

DEFINITION

Other IT Act Offences — IT Act, 2000 ke wo **crime sections** jo hacking/fraud ke alawa hain: tampering, identity theft, personation, privacy violation, obscene content, cyber terrorism, breach of confidentiality, aadi.

Simple: IT Act ki doosri police station (sections) — ek section se zyada crimes.

7.3 Flowchart

FLOWCHART

IT Act, 2000 - Offences

7.4 Key Other Offences (Table)

Section	Offence	Saza
65	Source code tampering	3 yr + 2 lakh
66C	Identity theft	3 yr + 1 lakh
66D	Personation se cheating	3 yr + 1 lakh
66E	Privacy violation (photos/videos)	3 yr + 2 lakh

67	Obscene content publish	3 yr + 5 lakh (1st), 5 yr + 10 lakh (2nd)
67B	Child porn	5 yr + 10 lakh
69	Unauthorized interception	7 yr + fine
70	Protected system access	10 yr + fine
72	Confidentiality breach	2 yr + 1 lakh
74	False digital cert / fraud publication	2 yr + 1 lakh

7.5 Important Points

IMPORTANT POINTS

1. **65 vs 66:** 65 = tampering (source code), 66 = hacking (system access).
2. **66C vs 66D:** 66C = pehchan churana (identity theft), 66D = pehchan se kaam karna (personation).
3. **67:** obscene — ek baar 3 saal, doosri baar 5 saal.
4. **70:** government protected system — sabse heavy (10 saal).
5. 66A (offensive messages) 2015 me **SC ne khatam** kar diya — free speech ke liye.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. 65 = tampering, 66C = identity theft, 66D = personation, 66E = privacy.
2. 67 = obscene (3 saal + 5 lakh), 67B = child porn (5 saal + 10 lakh).
3. 70 = protected system (10 saal), 72 = confidentiality breach (2 saal).
4. 66A Supreme Court ne 2015 me khatam kiya.

Viva Q1. 66C aur 66D me farak?

Ans: 66C = pehchan churana, 66D = us pehchan se cheating/kaam karna.

Viva Q2. Sabse zyada saza kis offence ki?

Ans: Section 70 (protected system) — 10 saal jail.

MEMORY TRICK

Trick: 6-6 ki line — 65 tampering, 66 hacking, 66C identity, 66D personation, 66E privacy, 67 obscene. Jaise **6 ke bhag** = andar ke kaandh.

PART 8 – MONETARY PENALTIES

Monetary Penalties — IT Act ke **penalty sections** (43, 43A) jisme jail nahi, **sirf paisa (fine/compensation)** lagta hai — zyada tar civil cases me.

8.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ek hospital ne apne patients ki medical records ek app me rakhe the — par **proper security** nahi thi.

- Hacker ne hospital ki site hack kar ke saare **patient records** chura liye.
- Patients ne hospital par case kiya.

Court ne:

- **Hacker** par Section 66 (criminal — jail) ka case bana.
- **Hospital** par Section 43A + 43 lagaya — kyunki wo **data protect karne me fail** hua.

Penalty: hospital ko **crore rupaye ka compensation** dena pada (Section 43A — up to 5 crore).

Jail nahi, lekin bhari bharakam fine — Monetary Penalty.

8.2 Definition

DEFINITION

Monetary Penalty — IT Act ke under laga **paise ki saza** (fine / compensation) jo company ya person ko deni padti hai jab wo cyber law todta hai — bina jail ke, zyada tar civil offence me.

Simple: Jail ka khel nahi — paise ka khel.

8.3 Flowchart

FLOWCHART

```

graph TD
    A["Cyber law ka violation (civil)  
(data damage, data breach, access w/o permission)"] --> B["Section 43 / 43A laga hota hai"]
    B --> C["Court: penalty + compensation"]
    C --> D["Victim ko paisa milta hai"]
  
```

8.4 Key Penalty Sections (Table)

Section	Kya hai	Penalty
43	Computer/network/data damage ya unauthorized access (civil)	Up to 1 crore per incident
43A	Data privacy protect na karna (sensitive data breach)	Up to 5 crore
44	Certifying Authority rules na maanna	Up to 2 lakh per rule
45	Residuary penalty (baaki civil violations)	Up to 25,000

8.5 Important Points

IMPORTANT POINTS

1. **Section 43 vs 66:** 43 = civil penalty (paisa), 66 = criminal (jail). Ek hi kaam — dono lag sakte hain.
2. **43A** — company sensitive data (health, biometric, financial) leak hone par **up to 5 crore**.
3. Penalty victim ko **compensation** ke roop me jata hai.
4. Ab DPDP Act 2023 (naya data law) bhi companies par heavy fines deta hai.
5. Penalty = **civil**; Offence = **criminal** — ye dono alag concepts hain.

8.6 Prevention (Bachao Ke Tarike)

- Companies **data security** seriously lein — encryption, access control.
- **Audit** karte raho — data kahaan gayi, kaun access karta hai.
- Data breach ho to **report + fix** turant — deri se penalty badhti hai.
- User data **minimum** rakho — jitna chahiye utna.
- Privacy policy **clear** rakho aur users ko inform karo.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Monetary penalty = paisa ki saza (civil), jail nahi.
2. Section 43 = up to 1 crore (damage/unauthorized access).
3. Section 43A = sensitive data breach par up to 5 crore.
4. 43 = civil (paisa), 66 = criminal (jail) — dono ho sakte hain.

Viva Q1. 43 aur 66 me farak?

Ans: 43 = civil penalty (paisa), 66 = criminal offence (jail).

Viva Q2. 43A kab lagta hai?

Ans: Jab company sensitive personal data ko protect nahi karti aur breach ho jaye — up to 5 crore.

MEMORY TRICK

Monetary Penalty = Paisa ki saja. Trick: **43 = 1 crore, 43A = 5 crore** — A wala Ameer (5) zyada. Jail me bass 66, 67, 70.

PART 9 – JURISDICTION AND CYBER CRIMES

Jurisdiction — kaunsa court / kaunsa desh case sune ga. Cyber crime **ek desh me baith ke doosre desh** ho sakta hai — to case kis ke paas jayega? Ye cyber law ka sabse bada puzzle hai.

9.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ek hacker **Mumbai** me baitha tha. Usne **USA ki bank website** hack kar li aur **London ke customer** ka paisa chura liya. Ab question: case kis desh me chalega?

- Crime ki website = USA.
- Victim (paise wala) = London.
- Hacker = India.

Solution (IT Act ke under):

- **Section 75** — agar crime me **India ki computer system/network** use hui, to Indian court case sunega.
- Agar hacker Indian hai to **IPC Section 4** bhi lagta hai — desh ke bahar bhi Indian par case.

Cyber crime me kaunsa desh/court case sune — Jurisdiction ka sawal.

9.2 Definition

DEFINITION

Jurisdiction — law aur court ka **adhikar kshetr** — kaunsa court kis case ko sunne layak hai. Cyber crimes me ye **trans-border** hote hain, isliye jurisdiction decide karna mushkil hai.

Simple: Chor pakda gaya, par **kis daroghi ke thaane me** case hoga — yehi jurisdiction hai.

9.3 Flowchart

FLOWCHART

9.4 Jurisdiction Rules (Table)

Rule	Kya kehta hai
Territorial	Jis jagah crime hua, wahi court sunega
IT Act Sec 75	India ki computer system/network use hui → Indian court
IPC Sec 4	Indian citizen ne desh ke bahar crime kiya → India me case
Sec 1(2)	IT Act kisi bhi desh ke person par lagta hai agar India ki system involve hai
Cyber Convention	International cooperation se offender pakadna

9.5 Important Points

IMPORTANT POINTS

1. Cyber crime ki **asli jagah (location)** clear nahi hoti — isliye jurisdiction confusing.
2. **IT Act Sec 75** — India ki computer involve hui to Indian court case sun sakta hai (extra-territorial).
3. **IPC Sec 4** — Indian citizen bahar se crime kare to India me case.
4. Har desh apna law lagana chahta hai — **conflict of laws**.
5. Solution — **international cooperation, treaties** (Budapest Convention), mutual legal assistance.

9.6 Prevention (Bachao Ke Tarike)

- Case karne ke liye **proof + complaint** apne hi court me karo (Sec 75 ki madad se).
- Cross-border crime me **international cyber cell / CERT** ko batao.
- Websites ko **India me jurisdiction clause** rakhna chahiye.
- Companies apne users ke liye **clear jurisdiction** likhein.
- Cooperation ke liye **Budapest Convention** jaise agreements follow karo.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Jurisdiction = kaunsa court/country case sunega.
2. IT Act Sec 75 = India ki system involve → Indian court (extra-territorial).
3. IPC Sec 4 = Indian citizen bahar crime → India me case.
4. Cyber crime trans-border hai — isliye international cooperation zaroori.

Viva Q1. Jurisdiction problem kyu hoti hai?

Ans: Kyunki attacker aur victim alag desh me ho sakte hain — location clear nahi.

Viva Q2. IT Act Sec 75 kya kehta hai?

Ans: Agar India ki computer system/network involved hai to Indian court case sun sakta hai.

MEMORY TRICK

Jurisdiction = Thaane ka sawal. Trick: **75 = System India ki, case India me.** Jahan computer, wahan court.

PART 10 – NATURE OF CRIMINALITY

Nature of Criminality — cyber criminal ki pehchan, unke kaam karne ka tareeka aur kyu wo crime karte hain. Cyber crime aam crime se **bahut alag** hai — isko samjna zaroori hai.

10.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ek 19 saal ka **Shaan** apne kamre me baitha tha. Uske paas sirf laptop + WiFi thi. Usne:

- Doosre desh ki company hack ki — **bina jaye, bina dastkhut ke.**
- Fake naam se account bana ke **koi pehchan nahi di.**
- Raat 2 baje attack kiya — **koi dekh nahi raha tha.**

Ab aam crime me: chor ko ghar me ghusna hota hai, pakda jata hai. Cyber crime me:

- **Koi physical presence nahi.**
- **Anonymity (chhupna aasaan).**
- **Risk kam, faida zyada.**
- **Ek kaam se crore logon ko nuksan.**

Isi wajah se cyber criminal ki nature badi alag hoti hai.

10.2 Definition

DEFINITION

Nature of Criminality — cyber criminals ki **characteristics aur crime karne ka tareeka**: anonymity, low risk-high reward, no physical presence, trans-border, technical skill, aur motive ke patterns.

Simple: Chor ke andar kya hai jo wo cyber world me itna aasan chalta hai.

10.3 Flowchart

FLOWCHART

10.4 Characteristics (Table)

Characteristic	Matlab
Anonymity	Chhupa rahta hai — fake identity se
No physical presence	Bina jaye bhi crime ho sakta hai
Low risk	Pakde jane ka dar kam
High reward	Ek kaam se bahut paisa

Trans-border	Ek desh se doosre desh ko nuksan
Technical skill	Tools + coding use karta hai
Young age (common)	Kai criminals 15-30 saal ke hote hain
Motive patterns	Paisa, revenge, ideology, thrill

10.5 Important Points

IMPORTANT POINTS

1. Cyber criminal **ghar me baith kar** bade-bade crime karta hai — isliye usse pakadna mushkil.
2. **Digital evidence** hi asli pakka saboot hai (IP, logs, devices).
3. Kaafi criminals **young aur skilled** hote hain — maang me skill, nahi to thodi badi.
4. Motives: **paisa (sabse zyada), revenge, show-off, ideology**.
5. Isliye police ko **digital forensics** aana zaroori hai.

10.6 Prevention (Bachao Ke Tarike)

- Criminals ke liye **maange kam** karne ke liye strong systems.
- **Digital forensics** teams ko train karo.
- **Anonymity** todne ke liye IP/logs tracking.
- Bachcho ko **ethical path** par le jao (cyber ethics + career).
- International cooperation se **trans-border** criminals pakdo.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Nature of criminality = cyber criminal ki characteristics (anonymity, no presence, low risk-high reward).
2. Cyber crime trans-border hai, evidence digital hai.
3. Common motive = paisa, revenge, ideology, thrill.
4. Investigation ke liye digital forensics zaroori.

Viva Q1. Cyber crime aam crime se alag kya hai?

Ans: Anonymity + no physical presence + low risk high reward + trans-border.

Viva Q2. Sabse common motive?

Ans: Paisa (financial gain).

MEMORY TRICK

Nature of Criminality = Chor ka profile. Trick: **ALPHA** — Anonymity, Low risk, Presence nahi, High reward, Aaram (technical skill).

PART 11 – STRATEGIES TO TACKLE CYBER CRIME AND TRENDS

Strategies — cyber crime rokne ke tarike (law, tech, awareness). **Trends** — aaj kal cyber attacks kaise badal rahe hain (ransomware, AI, deepfakes). Dono exam me aane wale points hain.

11.1 Long Practical Example (Real Life)

PRACTICAL EXAMPLE – REAL LIFE

Ek city ke **hospital network** me ransomware aaya — saare computers lock, demand: bitcoin.

Hospital ne ghabra kar **paise de diye honge**, par ye hospital ne strategy use ki:

- **Backup** the — systems wapas banaye gaye.
- **CERT-In** ko turant report ki.
- Attack ka **source** trace hua (international).
- **Staff training** se pata chala — email link se virus aaya.

Ye **strategy** hai — rokna (prevent) + pakadna (detect) + theek karna (recover).

Aur aajkal **trends** — ransomware, AI attacks, deepfakes, IoT hacks — sabse zyada chal rahe hain.

11.2 Definition

DEFINITION

Strategies to tackle cyber crime — plan to **roko, pakdo, sulao** cyber crime: strong laws, technical security, awareness, enforcement, international cooperation.

Cyber crime trends — naye-naye attack patterns jo ab chal rahe hain (ransomware, AI attacks, deepfakes, IoT, crypto frauds).

Simple: Strategy = cyber crime ka ilaaj; Trends = nayi bimariyan.

11.3 Flowchart

FLOWCHART

Strategies

11.4 Strategies (Detail)

Strategy	Kya hota hai
Legal	IT Act + naye laws (DPDP 2023), strong penalties
Technical	Firewall, encryption, backups, patching, AI threat detection
Awareness	Schools/companies me cyber safety training
Enforcement	Cyber police cells, digital forensics labs
International	Treaties, CERT-In cooperation, extradition

Reporting	cybercrime.gov.in, helpline 1930
-----------	----------------------------------

11.5 Trends (Aaj Kal Ke Attacks)

Trend	Kya hota hai
Ransomware	Data lock + paisa demand
Phishing 2.0	Spear phishing, AI se likhi fake emails
Deepfakes	AI se fake video/voice — fraud/defamation
AI-powered attacks	AI se fast + smart attacks
IoT hacks	Smart devices (camera, TV) hack hone
Crypto frauds	Fake crypto schemes, wallets
Cloud attacks	Cloud misconfig se data leak
Dark web	Stolen data market me

11.6 Prevention (Bachao Ke Tarike)

- Ransomware se bachav — **backups** + email links se savdhaan.
- Deepfakes se bachav — **verify karo** pehle, share baad me.
- IoT devices par **default password badlo**.
- Companies AI tools se **threat detection** karein.
- Har koi **report** kare — awareness hi asli bachav.

EXAM NOTES (2 MARKS / VIVA)

Exam Notes (2 Marks):

1. Strategies = Law + Tech + Awareness + Enforcement + International cooperation.
2. Reporting: cybercrime.gov.in, helpline 1930, CERT-In.
3. Trends = ransomware, AI attacks, deepfakes, IoT, crypto frauds, cloud hacks.
4. Ransomware se bachav = backup + training.

Viva Q1. Cyber crime se nipleine ke 3 tarike?

Ans: Law, technical security, awareness + enforcement.

Viva Q2. Ransomware me kya hota hai?

Ans: Data lock hota hai aur paisa (bitcoin) demand hota hai.

MEMORY TRICK

Strategy = Ilaj, Trend = Bimari. Trick: **L-T-A-E-I** — Law, Tech, Awareness, Enforcement, International. Trends ko yaad rakho: **R-A-D-I-C** — Ransomware, AI, Deepfakes, IoT, Crypto.

APPENDIX – QUICK REVISION SHEET (UNIT 3)

Sabse Pehle Yaad Rakho — One-Line Definitions

Topic	Ek Line Me
IT Act, 2000	India ka cyber law — cyber offences + penalties
Hacking	Bina permission system me ghus kar data churana/badalna/delete (Sec 66)
Teenage Web Vandals	Teens jo websites deface/hack karte hain mazak/show-off ke liye
Cyber Fraud	Internet par dhoka de kar paisa haasil karna (Sec 66D)
Defamation	Kisi ki izzat ko false + harmful baat se nuksan (IPC 499/500)
Harassment	Online pareshan karna — stalking, bullying, doxxing (IPC 354D, IT 67)
Monetary Penalty	Paisa ki saja — civil (Sec 43 up to 1 cr, 43A up to 5 cr)
Jurisdiction	Kaunsa court/country case sunega (IT Sec 75, IPC Sec 4)
Nature of Criminality	Criminal ki characteristics — anonymity, low risk-high reward
Trends	Naye attacks — ransomware, AI, deepfakes, IoT, crypto

Memory Tricks

- IT Act = **Digital gunahon ki book**.
- Section trick: **6-6 ki mithai** — 66 hacking, 66C identity, 66D personation, 67 obscene.
- 66A = **khatam** (SC 2015, Shreya Singhal case).
- Hacking = **Bina ijaazat ghusna**.
- Vandals = **Internet ke naughty bachche**.
- Fraud rule = **Pehle paisa maange to fraud**.
- Defamation = **Izzat ki LOL** (libel=written, slander=spoken).
- Penalty trick = **43 = 1 crore, 43A = 5 crore**.
- Jurisdiction = **Jahan computer, wahan court** (75).
- Nature trick = **ALPHA** — Anonymity, Low risk, Presence nahi, High reward, Aaram.
- Strategy trick = **L-T-A-E-I**; Trends = **R-A-D-I-C**.

Rapid Fire Viva (15 Questions)

Q	Answer
IT Act kab banaya?	2000
Section 66 ki saza?	3 saal jail + 5 lakh
66C ka matlab?	Identity theft (3 saal + 1 lakh)
66A ka kya hua?	SC ne 2015 me khatam kiya
Teenage vandals ka motive?	Show-off / mazak / attention
Cyber fraud me sabse common trick?	OTP nikalwana
Defamation ke 2 types?	Libel (written) + Slander (spoken)

Harassment ka sabse pehla step?	Block + reply nahi + screenshots
Cyberstalking ka section?	IPC 354D
Section 43 ki penalty?	Up to 1 crore (civil)
Section 43A ki penalty?	Up to 5 crore (sensitive data breach)
Jurisdiction ka IT Act section?	Sec 75 (India ki system → Indian court)
IPC ka jurisdiction section?	Sec 4 (Indian citizen bahar bhi)
Nature of criminality ka 1 point?	Anonymity / low risk high reward
Ransomware me kya hota hai?	Data lock + paisa demand

Note: Ye Unit 3 ka complete notes hai. Aage ke units same pattern par banenge.
